

Energy Resilience

Sponsor: Hawaiian Electric

By 2045, 100 percent of Hawai‘i’s electricity must come from renewable energy. This will greatly reduce our dependence on imported oil, lower electric bills and provide a more resilient and sustainable environment for future generations. And as an island paradise, our unique geographical isolation underscores the necessity for self-reliance in energy production.

Here are some ideas to inspire your media production:

- Energy efficiency and tips to reduce consumption
- Renewable energy benefits, ensuring energy security
- Safety around power lines
- How power grids operate
- Preparing for and responding to natural disasters
