

# Fentanyl Awareness

*Sponsor: HI Fentanyl Task Force*

Fentanyl is the deadliest drug our communities have ever encountered. No one is safe from this deadly poison as it affects people of all ages, from cities to rural areas. This is an urgent public health crisis as overdoses and deaths are increasing among youth.

Here are some ideas to inspire your media production:

- Real stories: Impact of fentanyl on families and communities
- Hidden struggles: secretly grappling with addiction
- Prevention through education: explain the risks associated with unhealthy substance use and opioid addiction
- Increase awareness of and access to naloxone
- Arts-based and mindfulness activities to help individuals in recovery manage stress and cravings
